### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeffrey Jacobs on 11/08/2007.

The application has been amended as follows:

Claim 14, line 1 "able to support" has been changed to --supporting--.

Claim 23, line 1 "able to support" has been changed to --apparatus supporting--.

Claim 24, line 1 "PCF of" has been changed to --PCF apparatus of--.

### ***Allowable Subject Matter***

Claims 1-24 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 14 are allowed because the prior art of record fails to teach or fairly suggest a system or method that includes a packet data serving node releasing a tunnel with a packet control function utilized to forward data for a mobile station and a portion of session context information to support a reduced dormant state, and sending a reconnection request to the packet control function for establishment of a new tunnel in response to receiving new data for the mobile station.

Independent claims 15 and 23 are allowed because the prior art of record fails to teach or fairly suggest a system or method that includes a packet control function apparatus releasing a tunnel between the packet control function and a packet data serving node utilized to forward data for a mobile station after a period of mobile station session inactivity and receiving a reconnection request from the packet data serving node for establishment of a new tunnel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure are:

- Lim (US 2002/0186696) teaches a method and system for packet data transmission.
- Sivalingham (US 7154903) teaches a system and method for management of data associated with a dormant mobile terminal.
- Schmidt et al. (US 6965588) teaches a method for expediting transitions between states of operation in communications equipment.
- Lee (US 2003/0128676) teaches a method of keeping-alive session and packet control function.

Art Unit: 2619

- Chen et al. (US 7031291) teaches a method and apparatus for delivering server-originated information during a dormant packet data session.
